Ding-Han (Sean) Yan

+1 (604) 977-6799 | Vancouver, BC | dhsyan@student.ubc.ca | github.com/DHSYan | linkedin.com/in/dhsyan

Education

University of British Columbia Sept 2022 — Dec 2027
Bachelor of Science, Honours Computer Science, UBC Science Co-op *Vancouver, BC*

Experiences

Software Engineer Intern Sept 2025 — Feb 2026
MetaGuru (Subsidiary of Qisda Corporation) *Taipei, Taiwan (Hybrid)*

- Architected an intelligent AI agent using Python, Celery, and Redis to automate meeting summarization across multiple messaging platforms (WeChat, LINE, REST APIs), eliminating 5-7 hours of manual documentation weekly.
- Built a PDF extraction tool using Google Vision AI API, streamlining workflows for 5 departments.
- Developed LDAP .NET middleware with SSO authentication, deploying containerized solutions via K3s, Nginx, Docker.
- Authored Model Context Protocol documentation, establishing practices that improved team efficiency by 80%.
- Led frontend development using C# and HTML, spearheading UI projects that enhanced experience for stakeholders.
- Managed Docker-containerized n8n automation servers, reducing deployment complexity and setup time by 70%.

Computer Science Teaching Assistant Sept 2025 — Present
University of British Columbia *Vancouver, BC, Canada*

- Undergraduate teaching assistant for first-year computer science course: CPSC 121: Models of Computation.
- Led tutorials and labs, proactively supporting students via office hours to boost concept mastery.
- Mastered propositional and first-order logic, discrete mathematics, circuits, regular expressions, and DFAs/NFAs.
- Honed strong communication skills by clearly explaining complex concepts to diverse student groups.

Mathematics & English Tutor May 2023 — Jul 2023
Meiko School *Taichung, Taiwan*

- Raised students' mathematics test scores from 46% to 96% through a pedagogical approach focused on problem-solving.

Projects

Homelab: Self-Hosted Infrastructure

- Run 7 self-hosted services (Git, photos, files) on 8 machines via Docker Compose, declared in Nix with automated backups.
- Secured with a WireGuard VPN, VLANs, firewall rules, TLS reverse proxy, and key-only SSH; zero public ports.

YouTube youtube.com/@DHSYan

- Produced YouTube videos showcasing CS, focusing on Neovim, learning strategies, and effective note-taking techniques.

Nix Config github.com/DHSYan/nix-config

- Engineered declarative Nix configurations ensuring identical OS environments across 8 systems, eliminating drift.
- Implemented infrastructure-as-code (IaC) automation for rebuilds with atomic rollback, reducing provisioning time.

Dotfiles: Developer Tooling and Productivity github.com/DHSYan/.dotfiles

- Maintain 54 Bash CLI tools that automate my dev workflow: shell scripts for C, fuzzy tmux project switching.

I Got You, Pal (UBC EDT Hackathon)

- Built a React Native (Expo) app for seniors with a simplified, accessible UI and fall/frustration detection.

Multi-threaded Chat App in C github.com/DHSYan/Terminal-Chat-App

- Built a multi-threaded chat application in C using TCP/UDP sockets and POSIX threads.

Skills

- **Languages**: TypeScript, JavaScript, Java, C#, C/C++, Python, SQL, Rust, Bash, Racket, Assembly, HTML/CSS
- **Frameworks**: React, Vue, Node.js, Express, .NET, Flask, Celery, Redis, REST APIs, Chart.js, Leaflet
- **Cloud & DevOps**: AWS (Lambda, S3, EC2, SQS, API Gateway), GCP, Docker, Kubernetes, Nginx, Nix, Linux
- **Data & Testing**: PostgreSQL, MySQL, MongoDB, Jest, Mocha, Supertest, JUnit, Git, GitHub Actions CI/CD
